Professional Summary

As an Information Technology professional, I possess a robust foundation in software development, computer functionality, and the delivery of exceptional software and hardware support. My expertise extends to proficient front-end development, portal management, oversight of Windows upgrades, and the provision of high-caliber end user technical support. I am adept at troubleshooting issues and implementing new hardware solutions to enhance performance. I am committed to continuously expanding my knowledge in the dynamic realm of technology to remain abreast of industry trends. I am actively seeking a challenging career opportunity where I can leverage my technical acumen, passion for innovation, and pursuit of personal and professional advancement within a progressive organization. My track record reflects a consistent delivery of high- quality results that surpass expectations and contribute significantly to the success of the industry

Certificate

- Machine Learning
- Technical Support
- Hardware and Operating systems
- Data Science

Project

Limpopo Varsity Hackathon website
https://lah.web.app/

Experience

1. **Tutor | Tshwane University of Technology | [March 2024 – Present]**
- Tutoring first year java programming module.
- Tutoring first year web development module.
- Tutoring second year database module.

2. **Information Center Technical Assistant | Tshwane University of Technology | [March 2022 - March 2024]**
- Ensuring the optimal performance and user experience of all computers in the information center by verifying their functionality.
- Updating and maintaining information and resources for users through the management of the I-Center portal.
- Assisting users in accessing and utilizing a variety of software applications and online resources.
- Conducting basic IT training sessions to aid users in enhancing their computer skills.
- Troubleshooting and resolving technical issues
- Providing technical support to staff members and students

3. **Front-End Developer Intern | ICEP | [May 2022 - May 2023]**
- Led the development of interactive and user-friendly interfaces for various web and mobile platforms, utilizing HTML, CSS, and JavaScript to create compelling digital experiences.
- Collaborated closely with multidisciplinary teams to gather and analyze user requirements, subsequently translating these insights into intuitive and visually appealing designs that prioritize user satisfaction and engagement.
- Engineered robust and scalable databases to efficiently store and retrieve data.

Skills

- Java
- C++
- Python
- JavaScript
- Streamlit Framework
- Angular Framework
- SQL, MS SQL, PSQL
- Problem solving
- Analytics
- Troubleshooting

Education

- **Advanced Diploma in Computer Science**
  February 2023 - INPROGRESS

- **National Diploma in Information Technology (Software Development)**
  February 2019 – December 2022

- **NSC Old Mill High School**
  2017
  Grade 12
